Mitsui Chemicals Completes Acquisition of ISCC PLUS Certification Aiming to expand the adoption of biomass-based / chemically recycled products under a mass balance system

Mitsui Chemicals, Inc. (Tokyo: 4183; President & CEO: HASHIMOTO Osamu) is proud to announce that it has acquired certification under the International Sustainability and Carbon Certification (ISCC) PLUS system for ACTCOL™ produced at its Nagoya Works (Nagoya City, Aichi Prefecture) in January 2026, certifying sustainable products.

Aiming to expand the adoption of biomass-based products and chemically recycled products under a mass balance system, Mitsui Chemicals Group plans to continue working toward the acquisition of ISCC PLUS certification to contribute to further advances in society's use of biomass and improvement of plastic recycling rates.

■ Products newly eligible to use ISCC PLUS certification

Product	Name of product	Main applications
Polypropylene glycol (PPG)	ACTCOL™	Flexible foam, Rigid foam, Elastomer, Civil Engineering / Construction Materials, Paint / adhesive, Synthetic leather / Synthetic resin raw materials
Polymer polyols (POP)		
Resin premix		

■ Products already eligible to use ISCC PLUS certification (including this time, approximately 50 products in total)

Please refer to the “Bio-based hydrocarbon and recycled derivatives via the mass balance method” section of the page about the Mitsui Chemicals Group's BePLAYER™ and RePLAYER™ products:
