

Cost reduction by injection molding

【Conventional material】

Non-Thermoplastic PI

【Issues of conventional materials】

High cost for machining (Semi-finished product)

【Required characteristic】

High dimensional stability parts by injection molding

Durability and compressive creep resistance

AURUM Advantage

- **Dimensional stability** (without machining)
- **Durability**

Possible to satisfy the requirements without machining process
Cost reduction by injection molding (Non-thermoplastic PI 90% reduction)

Recommended grade : PL450 BLACK
