

© Diamond Grindstone Binder: Fine Powder, High Temperature Stiffness

【Conventional material】

Thermosetting PI

【Issues of conventional materials】

Thermoset materials - Processing time (solvent removal)

【Required characteristic】

Workability (Processing temperature, cycle, and impregnation), High Temperature Stiffness, Slidability

AURUM™ Advantage

- Fine powder (20 μm powder size)
- Machining cycle
- High-temperature stiffness

Machining time can be reduced (Easy to process) ⇒ Cost reduction

Recommended grade : PD450、PD500A
