Lens kun

DoGreen™

Do Green™ is a plant-derived high index
eyeglass lens material developed by Mitsui Chemicals

It's time to be environmentally conscious, even for eyeglass lenses

\ Do Green™ 3 FEATURES /

1 Plant based material

Environmentally conscious starting from the raw material to make eyeglass lens materials

4 Eyeglass store

2 Biomass certification

MR-160DG™

MR-174™

Certified as biomass products by a third party certification organization (JORA*1 USDA*2)

*1 Biomass mark (JORA) : A mark (biomass mark) in which the Japan Organic Recycling Association (JORA) certifies environmental products that utilize biological resources (biomass) and comply with quality, related regulations and standard criteria.

*2 Biobased product certification mark (USDA) : Biomass mark indicating plant derived certification by the United States Department of Agriculture (USDA BioPreferred®)

3 Smaller carbon footprint

Compared to petroleum-derived equivalents, **CO₂ emissions*** are reduced by **8%** for MR-160DG™ and **14%** for MR-174™.

*3 Calculation in accordance with ISO 14067, using a model case whose evaluation scope ranges from raw material production to resin production.

DoGreen™ Product Lineup

Do Green™ products have exceptional optical properties as they are made of high index lens material MR™

- Thin and Light
- Safe and Resistant to Breakage
- Lasting Appeal
- Clear View
