Publication of Mitsui Chemicals Report 2017

Mitsui Chemicals, Inc. (President & CEO: Tsutomu Tannowa) has today published “Mitsui Chemicals Report 2017.” Designed as a platform for meaningful dialogue with stakeholders, the report provides a comprehensive overview of the Mitsui Chemicals Group’s strategy and performance, from both financial and non-financial perspectives.

Based on an integrated reporting and disclosure framework, an approach that is attracting increasing attention internationally, the aim of this report is to provide a better understanding of the group’s efforts to create value over the medium to long term, rather than relying on stylized content.

▼ Theme: “Sustainable Growth, -Starts with Action-”

We have launched a Long-Term Business Plan for the group, running from now until 2025.

The theme of this year’s Mitsui Chemicals Report is “Sustainable Growth, -Starts with Action-”, which reflects our determination to take on ambitious challenges in line with the start of our 2025 Long-Term Business Plan, as we work towards our goal of sustainable development for society and the Mitsui Chemicals Group. This report outlines the cycle of value creation that we aspire towards as a group, from perspective of economy, environment and society, while at the same time highlighting all of the hard work we are putting into creating value.

Chemicals must play a prominent role in addressing a variety of social issues. Mitsui Chemicals Group will continue to promote meaningful dialogue with stakeholders and engage in activities aimed at realizing the common global vision of creating sustainable society.

The English version of this report is scheduled to be published in early October.
