Demodialyzer: Impeller (For Discharge): High precision gear

artificial dialysis machine

high-precision gear

[Conventional material]

Metal, other thermoplastic materials (PEEK, PES)

(Issues of conventional materials)

Metal: corroded

Resin: part dimensional stability, chemical resistance

[Required characteristic]

Dimensional Stability, Chemical resistance

AURUM™ Advantage

- Part accuracy (low warp)
- ·Chemical resistance
- corrosivity

High precision gear (discharge of liquid) can be created, and discharge amount is stable.

Recommended grade: JCF3025
